

Student Guide & Comprehensive Exam Instructions

Two minutes of reading before the exam: how to enter, how to answer, what is not allowed, and what to do if the internet drops or the exam locks.

 Duration (min): 360 min

 Max fullscreen exits (0 = unlimited): 3

 Camera snapshot interval (sec): 60

Key rules – read before you start

1. Stay in fullscreen. Leaving it more than 3 times ends the exam.
2. You have 360 minutes from the start; the exam submits automatically when time is up.
3. Answers save automatically – there is no Save button.
4. If the internet drops, don't close the page; answers are kept and sent when it returns. The timer keeps running.
5. Not allowed: switching tabs, leaving the window, copy/paste, right-click, screenshots. All of it is logged.
6. The camera (if enabled) takes a snapshot every 60 seconds – sit alone with your face visible.
7. Submission is final. Check the answered counter before confirming.
8. If your exam gets locked, don't retry; contact the supervisor to reopen it with your answers.

|  1. Before the exam |  2. Entering and starting |
|  3. During the exam |  4. How to answer |
|  5. Proctoring, time and locking |  6. Submitting and results |

1. Before the exam

- A computer or laptop (not a phone), updated Chrome or Edge, stable internet, charger plugged in.
- A working camera if the exam requires it, and a quiet place where you sit alone.
- Close all other programs and tabs; have your exam code and 10-digit ID ready.

2. Entering and starting

- Open the platform link → "Candidate portal" → enter the exam code and ID → "Verify".
- Make sure every device check is ✓ (screen, browser, internet, camera).
- Tick the three consents, then press "Start exam" – time starts and fullscreen begins.

- Browser closed by mistake? Re-enter with the same code and ID to resume with your answers and remaining time.

3. During the exam

- Top: remaining time (turns red in the last 5 minutes) and the “auto-saved” indicator.
- Side: question numbers – green answered, white unanswered, orange dot = flagged . Click any number to jump to it.
- The “?” button at the top shows these rules anytime without leaving fullscreen.

4. How to answer

- Single choice / true-false: click the option. Multiple choice: select all correct ones – partial credit, wrong picks are penalized, so don’t guess.
- Short answer: a word or phrase. Numeric: the number only (e.g. 42). Essay: write a complete, organized answer; graded manually.
- Image attachment (when allowed): upload a photo of your solution; opening the file dialog does not count as leaving.

5. Proctoring, time and locking

- The exam is fully proctored: every exit, tab switch or copy attempt is logged and seen by the supervisor.
- Left fullscreen? Press “Return to fullscreen” immediately – the limit is 3, then the exam locks.
- Time is kept by the server and never pauses. Only a supervisor can extend it.
- If your exam locks, a red screen appears; contact the supervisor – they can reopen it with all your answers kept.

 **Cheating or attempting to cheat cancels the exam and leads to formal action.**

6. Submitting and results

- Review white (unanswered) and orange (flagged) questions, then “Submit exam” → confirm. No undo.
- Time over? It submits automatically with what you answered.
- Results are announced on the main fellowship website after approval – no lookup inside the platform.
- Any problem during the exam: contact the room supervisor or the fellowship administration via the official channel.
